

Report Volume 11, Pts. 1903-1904

By Colorado State Coal Mine Dept

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1905 Excerpt: . upper seam is 12 feet thick, semi-coking in character; slate roof, which, being only 100 feet from the outcrop, was rather tender, but it may improve with greater depth. Dip of measures, about 5 per cent, opposite to the direction of the drainage. The Moffat railroad survey passes in close proximity to this property. That this enormous wealth of coal has been permitted to lie undeveloped up to the present time is, as previously stated, due to the fact of the remoteness of the field from transportation facilities. The development and a systematic mining of this rich section of the State of Colorado will come in response to fuel demands. The completion of the Moffat railroad, which is now being constructed, will bring the field in touch with extensive markets east and west. The coal being of superior quality to that of the eocene beds...
