

## Put Baby Back in the Corner. Why neuroscience needs to slow down

Filesize: 2.33 MB

### ***Reviews***

*A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.*

GRIN Verlag Aug 2013, 2013. sonst. Bücher. Book Condition: Neu. 210x148x1 mm. This item is printed on demand - Print on Demand Neuware - Essay from the year 2013 in the subject Psychology - Methods, Jacobs University Bremen gGmbH, language: English, abstract: 1990-2000 was declared by the US Congress to be the 'Decade of the Brain'. With projects like the Human Brain Project and the American answer of the BRAIN Initiative recently in the news for the millions they received in funding, it appears evident that neuroscience has captured public attention. But those working within the field have begun to notice an alarming new trend. Every other day it appears that there is a new flavor of neuroscience. There is Neuroethology, Neurolinguistics, Paleoneurology, Cultural Neuroscience, Neuroeconomics, and the list goes on. Neuroscience is becoming full of these specialized niches of inquiry. The logic behind these specialties is that since everything comes from the brain, everything can be reduced to a neuroscientific argument eventually. In general, too much specification within in science can be bad. Scientists have the tendency to create categories in the world and put certain phenomena into boxes that are realms of study. Thus, there is chemistry, which is distinct from biology, which is distinct from psychology. It is easy to see that in reality there are no clear lines of what makes a problem a chemical, biological or psychological one and that to truly understand a problem it must be viewed from all levels. However, this fact is easily forgotten and scientists often find themselves trapped looking at a problem only through their personal science's paradigm. This categorization can lead to scientists forgetting the context of a problem which can actually influence and determine the nature of an issue all together (Barrett, Mesquita, & Smith, 2010). But...
