*This book is great. I have go through and so i am confident that i will going to read through once again again in the future. I am just easily can get a satisfaction of looking at a written book.  
(Miss Vernie Schimmel)*

## ANIMAL INTELLIGENCE: FROM INDIVIDUAL TO SOCIAL COGNITION

Cambridge University Press, Cambridge, UK, 2007. Paperback. Book Condition: Brand New. First Edition. From ants to whales, the lives of animals are filled with challenges that demand minute-by-minute decisions: to fight or flee, dominate or obey, take-off, share, eat, spit out or court. Learning develops adaptive tuning to a changeable environment, while intelligence helps animals use their learned experiences in new situations. Using examples from field to laboratory, *Animal Intelligence* pools resources from ethology, behavioural ecology and comparative psychology to help the reader enter the world of wild intelligence through the analysis of adventures, of ideas and methods, rather than through theoretic modelling. It reminds us that there is a world of intellectual biodiversity out there, providing a multi-faceted panorama of animal intelligence. Written in an accessible and charming style, and with undergraduate and graduate students in mind, this book should be read by anyone with an interest in the world of animal behaviour. Gives a detailed comparative analysis of different experimental approaches to studying all possible aspects of animal intelligence giving students a complete picture of the complexity of non human behaviour Considers animal intelligence within the context of animals' natural world including social inter-relations and specificity. Integrates modern experimental paradigms of cognitive ethology, behavioural and evolutionary ecology, sociobiology, comparative psychology and physiology Contents Part I. Development of Ideas and Methods in Studying Animal Intelligence: 1. Evolution of views on animal intelligence; 2. Dramatic adventures of behaviourism; 3. Intelligence under a scalpel: starts and false starts of neuroscience; 4. Integrative approaches and coherent movement in studying animal intelligence; 5. Ethological approaches for studying animal learning; Part II. Animals are Welcome to the Class: Learning Classes: 6. Habituation and associative learning; 7. Learning classes beyond 'simple' associative learning; Part III. Past and Future in Animal Life: Remembering, Updating and Anticipation:...
