Springer-Verlag New York Inc. Hardback. Book Condition: new. BRAND NEW, Time Series Analysis: With Applications in R (2nd ed. 2008. Corr. 3rd printing, 2009), Jonathan D. Cryer, Kung-Sik Chan, This book has been developed for a one-semester course usually attended by students in statistics, economics, business, engineering, and quantitative social sciences. A unique feature of this edition is its integration with the R computing environment. Basic applied statistics is assumed through multiple regression. Calculus is assumed only to the extent of minimizing sums of squares but a calculus-based introduction to statistics is necessary for a thorough understanding of some of the theory. Actual time series data drawn from various disciplines are used throughout the book to illustrate the methodology.
