RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 66 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 Excerpt: . . . involved, the vesicles usually occur on the toes and heel. They occasionally occur on the genitals and about the nipples. Very rarely they may be disseminated over the whole body. They rupture and heal much as do those in the mouth. Secondary infection of the ulcers on the toes or fingers may lead to loss of the nails. In severe cases petechiae have been described. In children, and less often in adults, there may be more serious general symptoms, with chills, high fever, colicky abdominal pain, nausea, vomiting and diarrhea with bloody stools. Such cases may end fatally, as may those in which serious secondary infections occur. During a severe epidemic near Berlin, reported by Siegel, out of a population of 9, 000 it was estimated that two-thirds contracted the disease during a period of three years. There were 36 deaths attributed to the infection, 15 in children and 21 in adults. Proof of the identity of the disease in man and animals has been furnished by Schautyr and by Ber tarelli, who each transmitted the disease to calves by inoculation with a virus obtained from a human subject. Trichloracetic Acid And Radium In Dermatology. Concerning the use of trichloracetic acid in dermatology Aikins writes (Can. Prac. and Review) that he has found it a most valauble adjunct in various lesions, particularly in seborrheic and senile keratosis. The most important effect of the acid on the skin is due to its keratolytic action. It dissolves horny...
