Not illustrated. 1899 Excerpt: .of canes of different varieties different, the water content of any one cane is a changing factor. Cane grown under dry conditions, or cane which has not received any water for a length of time, is dried out. and a relatively low content of water and high amount of solid matters are found, and vice versa. In fact, it is known to persons who have made careful physiological and chemical studies of the sugar cane, and of the sugar beet, that the water content in the morning is greater than in the evening of the same day, and this is quite noticeable on days of great heat and high winds. The same chemist, with the same polariscope, can find a difference of from Q.ltf and 0.4. This is very specially the case with the sugar beet, whose leaves in the early morning are erect, and in...
