

Experimental Pharmacognosy and Phytochemistry

Filesize: 2.37 MB

Reviews

This ebook is very gripping and fascinating. Sure, it is engage in, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Ms. Ora Buckridge)

EXPERIMENTAL PHARMACOGNOSY AND PHYTOCHEMISTRY

Studera Press, 2016. Soft cover. Book Condition: New. Natural drugs and derived products are gaining worldwide popularity due to numerous advantages including easy availability, possible source of lead molecules, synergism with modern drugs and their significant research opportunities. Due to the advancement in chromatographic (e.g., Flash chromatography) and spectroscopic (e.g., sensitive NMR probe analysis, RDC-Residual Dipolar Coupling) technologies, the integration of natural products in HTS (High Throughput Screening) is possible. Again the better understanding of intellectual property rights and regulatory affairs by research scientists, students and professional has increased the pace of research for technological development in herbal drugs. Thus, the authors have designed this book to cover all important and necessary information of experimentations in pharmacognosy and phytochemistry. This book will provide readers with a concise overview of extraction, isolation, purification, qualitative and quantitative estimation methods of different natural drugs of classes like glycoside, alkaloids, volatile oils, lipids, carbohydrates, pigments and resins. Relevant basic theory is provided to have better understanding of experiments. List of spraying and common reagents can be very helpful in day-to-day laboratory work. This is not intended to be a complete and comprehensive list, but should set the stage for future elaborations. The book as a whole is aimed at all students, professionals to keep abreast with details of experiments in phytopharmacognosy. Authors hope that this book will be very helpful to the new as well as experienced researchers directly or indirectly concerned to this field. Key Features Unique in its coverage Provides concise rewritten clear text Well documented much useful laboratory techniques Compressive index and innovative presentation Spectroscopic details for few natural chemicals Herbal cosmetic formulas Plant tissue culture experiments More than 50 estimation techniques Isolation methods for more than 70 natural chemical compounds More than 100 general chemical tests for preliminary phytochemical screening...
